PROFESSIONAL SUMMARY

DevOps engineer with 3+ years of hands-on DevOps experience and 6+ years across cloud infrastructure, CI/CD automation, Linux systems, data center/network operations, and production reliability. Experienced with AWS and Azure environments, Terraform and AWS CloudFormation, Jenkins pipelines, Ansible automation, Docker/Kubernetes platforms, monitoring/observability, incident response, database HA planning, and secure deployment practices. Strong fit for teams that need scalable cloud infrastructure, reliable releases, clear communication, and continuous improvement.

SELECTED DEVOPS IMPACT

- Automated CI/CD delivery for multi-stack applications including Node.js, Java Spring Boot, Python FastAPI, PHP Laravel, Rust Actix Web, React, and Angular.
- Built repeatable infrastructure and deployment workflows using Terraform, AWS CloudFormation knowledge, Jenkins, Ansible, Docker, Kubernetes, and Git-based version control.
- Planned production deployment strategy across DC, DR, and Far-DR environments with artifact preservation, backup/restore workflows, and release readiness.
- Improved reliability and cost efficiency through PostgreSQL HA/failover design with HAProxy/Patroni and Azure cloud cost optimization saving USD 4,800 annually.

TECHNICAL SKILLS

Cloud Platforms: AWS: EC2, VPC, CloudWatch, CloudFront, RDS, Load Balancer, S3, ECS, EKS, Route 53, Lambda, ECR, CloudFormation, CodePipeline, SQS, SNS; Azure: VM, VNet, AKS, Blob Storage, Load Balancer, DNS Zones

Infrastructure as Code & Automation: Terraform, AWS CloudFormation, Ansible, Bash/Shell scripting, Python automation; basic Chef/Packer concepts

CI/CD & Version Control: Jenkins Pipeline, AWS CodePipeline, Git, GitHub, Bitbucket, AWS CodeCommit; GitLab CI fundamentals

Containers & Web Platform: Docker, Kubernetes, EKS, AKS, Nginx, Apache, HAProxy, DNS, NTP, SFTP, Postfix

Monitoring, Logging & Incident Response: Prometheus, Grafana, CloudWatch, Elasticsearch, Logstash, Beats, Kibana, cAdvisor, Nagios, SNMP; Datadog fundamentals

Databases & High Availability: PostgreSQL, MySQL, MongoDB, Redis, AWS RDS, HAProxy/Patroni, backup/restore, replication concepts

Security & Compliance: SonarQube, Trivy, Kubesecc, DOCKScan, SELinux, firewall/UFW, WAF, PKI/TLS, Certbot, vulnerability scanning, SOC 2/PCI DSS awareness

Programming: Python, Bash/Shell, Node.js

PROFESSIONAL EXPERIENCE

Operations Engineer (DevOps & Production Reliability) | Portonics Limited

Dhaka, Bangladesh | 2026 - Present

- Support production reliability for Robi/Airtel SingleApp, triaging customer-impacting incidents from ServiceDesk/JIRA/CMS, coordinating RCA, escalations, and closure with Robi, QA, developers, and business teams.
- Operate Kubernetes-based production workloads using Argo CD, Jenkins, Harbor, Docker/ctr, and Nginx.
- Monitor platform health with Dynatrace, Kibana/ELK, Grafana, Prometheus, Node Exporter, Fluentd, and flat-file logs; investigate API failures, latency, log-buffering, disk utilization, and infrastructure alerts.
- Maintain PostgreSQL/PGPool and Redis Sentinel reliability through replication checks/restores, controlled reboot MOPs, SQL diagnostics, dumps/restores, cache cleanup, and backup validation.
- Execute production change activities including MOP/SOP preparation, CR coordination, release sanity checks, cluster upgrade and certificate renewal support, SSL/TLS certificate updates, load balancer/Nginx changes, and patching readiness.
- Automate operational reports and data extracts using Bash/Python/PHP scripts, cron jobs, PostgreSQL COPY, SCP, and email workflows for registration, roaming, rating summary, FWA/WiFi, payment reconciliation, refunds, and customer issue analysis.

PROFESSIONAL EXPERIENCE CONTINUED

DevOps Engineer | Praava Health Bangladesh Limited

Dhaka, Bangladesh | Jul 2024 - 2026

- Planned and executed CI/CD deployment workflows for Node.js applications, migrating manual build, test, and release tasks into Jenkins pipelines.
- Built automated cloud infrastructure using Terraform and AWS/Azure services; strengthened environment consistency through infrastructure-as-code practices.
- Implemented CI/CD security controls and deployment best practices using tools such as SonarQube, Trivy, Kubesec, and controlled pipeline stages.
- Dockerized Python and Laravel applications and migrated workloads to AWS to improve reliability, repeatability, and security posture.
- Automated server configuration and application deployment with Ansible, designed PostgreSQL HA/failover with HAProxy/Patroni, and reduced Azure cloud spending by USD 4,800 annually.

DevOps Engineer | Technohaven Company Limited

Dhaka, Bangladesh | Apr 2023 - Jun 2024

- Streamlined Jenkins CI/CD pipelines for Java Spring Boot, Rust Actix Web, Node.js Express/React/Angular, Python FastAPI, and PHP Laravel services.
- Planned deployment strategy across DC, DR, and Far-DR environments, including artifact preservation, backup, restore, release rollout, and rollback readiness.
- Configured Nginx reverse proxy and service routing to support reliable application delivery across multiple workloads and environments.
- Implemented application and network monitoring using Elastic Stack, Nagios, and SNMP to track system health, availability, and performance.
- Automated configuration management and application deployment with Ansible for faster, repeatable release execution.
- Worked with developers, QA, and operations teams to troubleshoot deployment issues and improve production support processes.

Network Engineer | Square InformatiX Limited

Dhaka, Bangladesh | Feb 2020 - Apr 2023

- Installed, configured, and provisioned Cisco and MikroTik networking devices for production and data center environments.
- Monitored and managed data center infrastructure, including network availability, UPS/AVR power systems, VMs, and required software services.
- Provisioned virtual machines and supported baseband and satellite hub modem configuration as required by operations teams.
- Identified, troubleshooted, and resolved network, server access, and data center issues to maintain service continuity and operational uptime.
- Built a strong foundation in Linux/server administration, networking, incident response, and infrastructure operations that supports DevOps reliability work.

CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA) - RHEL v9
- AWS Certified Solutions Architect - Associate (SAA-C03)

EDUCATION

Chittagong University of Engineering & Technology (CUET) | B.Sc. in Electronics & Telecommunication Engineering | Chittagong, Bangladesh | Sep 2019

Govt. City College | Higher Secondary Certificate, Science | Rajshahi, Bangladesh | Apr 2014
